

Appln No. 10/728,923
Amdt. Dated August 29, 2005
Response to Office Action of June 29, 2005

2

Amendments to the Specification:

At Page 1, line 1, is to be deleted.

At Page 1, line 4, a new paragraph entitled "Cross Reference to Related Application" is to be added, just below the Title, as follows:

The present application is a continuation of US Application Serial No. 10/129,502 filed on May 6, 2002, now issued as US Patent No. 6,716,666, which is a 371 of PCT/AU02/00008 filed on January 8, 2002, all of which are herein incorporated by reference.

The Paragraph beginning at Page 6, lines 2-10, is to be amended as follows:

An array of caps 48 is formed using conventional injection molding methods and steel mold tools 50 & 52. The caps are supported on a sprule 54 at the same nominal spacing as the groups 42. Using this method will almost invariably lead to misalignment with resulting destruction of MEMS devices, as shown in figure 207. In figure 207 the cap 48a has been aligned correctly with its group of MEMS devices 42a. However the spacing between the caps is greater than the spacing of the groups so that cap 48b is not aligned correctly, but does not destroy any of the MEMS devices of its respective group 42b. However, the caps 44c & d are sufficiently misaligned that the perimeter walls of the caps overlay one or more of the MEMS devices 44, destroying their functionality.
